Summary

I am a Full Stack Developer with 10+ years of industry experience. I love challenges and learning new technologies while perfecting existing. While learning never ends. I love finding ways to improve my code and prefer clean code for later references. I feel like Object Oriented Programming brings the whole new perspective to programming paradigm, so I love it. Mostly, I have been a Backend Developer with technologies like PHP/NodeJS but with trends, I learned to work with Frontend JS libs, like ReactJS / VueJS / Angular, etc I have very good organisational skills, agility in self-management, a team player, computer fundamental knowledge, software architecture design and more.

Technical Skills

My skills includes but, aren't limited to:

Backend Development using Node.js / PHP7 / Laravel / Symfony

JavaScript, TypeScript, ReactJS, Angular, VueJS, Redux, Vanilla JS

SDLC, TDD, Agile, Scrum, Slack, OOPS Programming Fundamentals

Product Development / DevOps / CI-CD / Docker / GIT / AWS / Google Cloud Platform / Server Administration, CRON, CURL

REST API's (Google Cloud/ Maps / Analytics / FB / Many others)

RDBMS, Database Schema Designer and used (MySQL / Couchbase / MongoDB / Redis / FileMaker / JSON)

Mobile Development (iOS/Android) using (React Native / iOS)

Team Leader for several Projects

Career History

FULL STACK DEVELOPER / TEAM LEAD at dMark Solutions

Jul 2014 - Present (5 years and 2 months)

Brand development, Business Development/Planning, handled projects based on multiple stacks and DB technologies. Learned a wide array of technologies and worked on different platforms. Lead teams to the successful completion of multiple projects (In-House and Remote)

Full Stack PHP/JS Developer at EXPERTZWEB

Jul 2010 - Aug 2014 (4 years and 1 month)

This was the time to learn to shine. More technologies, I was learning, hungrier I was. Tech Stack was changing every day and that presented a challenge to keep up the pace to learn while working. So, I learned time management and self-management. Worked on distributed systems such as RabbitMQ, CRON Jobs, Backend and Frontend AJAX.

SR. PHP DEVELOPER at A1 TECHNOLOGY

Jan 2009 - Jun 2010 (1 year and 5 months)

As I learned and moved to a new job. I along with that started learning new things along with my Job. It was all fun along the way. I learned working in larger teams and software development Lifecycle. Above all SCRUM method for regular delivery for testing.

PHP Developer at SMARTBUZZ INC.

May 2007 - Dec 2008 (1 year and 7 months)

My first full scale job as a PHP developer and this is where I started learning my way into this all. I used to be a JAVA lover, which helped me throughout my learning process.

Education

Bachelor of Technology (Computing Studies) from Dr Bhimrao Ambedkar University
Graduated 2007

DIPLOMA IN COMPUTERS from CEDTI
Graduated 2000

Higher School Certificate from Punjab School Education Board
Graduated 1999

Preparing for **IELTS** Exams
